QM ESPIONAGE MANUALS

There is no other place on the web, or in any mega library anywhere, where people interested in spying, espionage, HUMINT, counter intelligence, spy webs, tradecraft, and many other aspects of the espionage world can obtain in-depth, how-to information from all over the world. QuikManeuvers.com offers 23 very popular how-to electronic format Espionage Manuals (soon to be over 30), and over 25 other specialized e-books on intelligence, counter intelligence, and security; both military and civilian. →

If you want to understand and master the arcane human aspects of spying and counter spying, from World War II through 2008, and beyond, then QuikManeuvers.com's spy collection is for you. Our prices are affordable, and our exciting material, replete with many charts and other graphics, is first rate.

Our skilled operatives constantly obtain raw intelligence from sources all over the world, but we go further. Our trained and experienced staff also examines critically the spying capabilities and mindsets of many of the world's major spy agencies, including the spy agencies of China, Russia, Israel, the Middle East, and the USA.

Our topics range from HUMINT (which we value above all), to clandestine communications tradecraft, steganography and pretty good PGP-type cryptology programs, to the latest techniques in anomaly identification and biometrics.

Whether you are in the security, intelligence, or industrial espionage fields; or simply an espionage aficionado, we offer you user-friendly material bereft of pomposity and jargon that will both stimulate and educate you. If you read the right selection of our e-books, you will know more about spying than any CIA or DIA case officer or analyst.

In the future, www.quikmaneuvers.com will be offering a course on modern espionage control. Student subscribers will be taught basic frames of reference, deceptions and other methodologies devised to beat first through third world nations in the espionage war. We are looking for people who have a flair for espionage. Below is a scene observed from a reconnaissance aircraft. (The vehicles carry two tons each). Please answer the following questions:

1. What do you see?
... describe the scene.
2. How many vehicles in the convoy?
3. How much tonnage are they carrying?
4. How long is the convoy?
5. What size unit could be supplied by this one convoy for one day?
6. What type of terrain is this?
7. Evaluate the man-made elements in regards to military significance.
8. What else do you notice that might be of intelligence value?

The participant offering the most complete and insightful answers to the above questions will receive a free intelligence book. This contest will be over on December 20, 2007.

Your answer, along with your email address should be sent to:

Breaker McCoy

“A nation can survive its fools, and even the ambitious. But it cannot survive treason from within. An enemy at the gates is less formidable, for he is known and carries his banners openly. But a traitor moves among those within the gate freely, and his sly whispers rustling through all the alleys are heard in the very halls of government itself. For the traitor appears no traitor; he speaks in accents familiar to their victims and wears their face and their garments, and appeals to the baseness which lies deep in the hearts of all men. He rots the soul of the nation; he infects the body politic so that it can no longer resist. A murderer is less to be feared.”
-- Cicero

Hitler's Commandos **Abwehr Brandenburg Commandos** **Special Operations**

In accomplishing their missions, the Brandenburg used every form of descent including: vehicular, amphibious, parachute, foot mobile, and glider. **Hitler's Commandos** describes the salient adventures of the Brandenburg Commandos that culminated in the last days of the Third Reich, when the Brandenburg Panzer Grenadier Division fought to the end to protect Reich and Fuhrer while bitterly remembering the betrayals of Canaris, the Abwehr's traitor spymaster. It is an ugly fact that, although the men of the Brandenburg fought with both courage and imagination in defense of their nation, the agency that spawned them, the Abwehr (German Intelligence) and its chief, Canaris, were both traitors.
